Permata Depok B2/10 Sektor Mutiara, Pondok Jaya - Cipayung

Motivated Information Technology graduate with a strong track record in data automation and backend development. Proven experience in automating finance reporting and managing complex datasets using Python and Office Scripts. A proactive leader with experience in managing cross-functional teams, seeking to leverage analytical and technical skills to drive digital transformation and operational efficiency.

Work Experiences & Projects

Nevmock - Bandung, West Java, Indonesia Apr 2025 - Dec 2025
BackEnd Developer

- Built the backend foundation for a no-code website builder project by designing a PostgreSQL data model for drag and drop components/layouts, implementing Django services & REST APIs, and enabling users to assemble pages and site structure from predefined templates

PT Finnet Indonesia - South Jakarta, Special Capital Region of Jakarta , Indonesia. Jul 2025 - Aug 2025
BackEnd Developer

- Developed backend features for an internal ITSM CRM used by approximately 100 users by implementing search/filter APIs and server-side pagination, improving data retrieval efficiency and reducing heavy response payloads

PT Telekomunikasi Indonesia Tbk - South Jakarta, Special Capital Region of Jakarta , Indonesia. Aug 2025 - Jan 2026
RPA Developer

- Automated 6 financial reporting use cases by extracting and cleansing SAP FI/CO data using Python, n8n, and Power Automate, delivering final insights with Power BI dashboards.
- Developed an internal web interface enabling 6 finance personnel to easily trigger RPA workflows with custom SAP parameters, significantly accelerating the financial reporting process.
- Built a RAG chatbot using n8n to answer recruitment FAQs, curating a custom knowledge base of 40 QA pairs to ensure highly accurate and context-aware automated responses.

Improving LSTM-Based Phishing Email Detection Using Emotion Feature - Self Projects
Machine Learning Engineer

- Fine-tuned DistilBERT on 40,000 samples to classify 6 emotion labels from phishing email text
- Built dual-branch LSTM architecture fusing text and emotion features for phishing classification
- Achieved 98% accuracy and improved precision by 0.03 compared to text-only baseline model
- Evaluated on 5,800 emails; emotion features reduced false positives on legitimate emails
- Published fine-tuned model to HuggingFace Hub, making it publicly accessible

Education Level

SMA Pesantren Unggul Al Bayan - Sukabumi Regency, West Java,Indonesia Jul 2019 - May 2022
Senior High School, Natural Science, 89.36/100.00

Universitas Telkom - Bandung Regency, West Java Sep 2022 - Jan 2026
Bachelor of Information Technology, 3.63/4.00

Organisational Experience

Himpunan Mahasiswa Teknologi Informasi - Telkom University Mar 2024 - Feb 2025
Entrepreneurship Staff

- Led the end-to-end production and targeted sales of IT student association merchandise, successfully selling 149 association jackets and generating a 33% profit margin.

INTERIUM FESTIVAL May 2024 - Dec 2024
Vice Head of logistic division

- Responsible for directing 20 division members in preparing the event, including meeting locations, stage equipment, permits, and vendor coordination, while overseeing the smooth execution of tasks

Vice President

- Responsible for coordinating 40 committee members across various divisions, offering ideas and suggestions for the smooth execution of the event, and overseeing preparations both before and during the event.

Skills,Achievements

- **Programming Skills:** Python, Pandas, PyTorch, HuggingFace Transformers, TensorFlow, NLTK, Go, Java,JavaScript, Dart, HTML, CSS, Tailwind CSS, Node.js, Laravel, Spring Boot, Flutter
- **Achievements** (2025): 2nd Place (Silver Medalist), Research Mindedness Competition (part of Epicentrum, Padjadjaran University, Indonesia) – Developed a web-based platform for anonymous mental health consultations (Remind Chat) as a research-based strategic solution.
- **certifications** (2024): Microsoft Office Specialist - Microsoft Excel 2019 Certifications
